

# AUTOMATE YOUR CASH

THE "UNATTENDED CASH ROOM"

The unique **Sentinel BCD-R** product set is designed to fully automate the cash room processes. From dispensing coins and notes for the start-of-shift till drawer balance, to returning coins, notes and all other financial paper at day's end, the goal is to help you develop an "Unattended Cash Room". The **Sentinel BCD-R** provides you the necessary reporting to balance every cashier's till drawer, has back-end network connections and includes a full Cash-in-Transit courier pickup process that can be customized to your specific requirements. The **Sentinel BCD-R** will balance each cashier to the penny, provide end-of-day automation, validate and recycle coins, validate, count and secure notes, automatically prepare your bank deposit and it will do all this in an "Unattended Cash Room".
