# SENTINEL BCD-R

The Tidel Bulk Coin Dispenser and Recycler module will change the way you think about cash automation in your counting room. Due to the Sentinel modularity, the Bulk Coin Dispenser with Recycler may be coupled with a High Capacity Note Dispenser and a Note Validation module to provide a complete solution for employee cash accountability. Cashiers begin their shift by dispensing coins and notes authorized for their own till drawer. At end-of-shift, cashiers drop their coins and notes back into the system for final bank out. The Sentinel BCD-R module saves you time and eliminates manual counting errors and shrink by automating all of your cash management functions so you can focus on business and not counting cash.

## SPECIFICATIONS:

Weight: 950 lbs. (431 kg)  
Height: 46.75" (1188 mm)
