# SENTINEL HCND

The Sentinel™ HCND (High Capacity Note Dispenser) is the fastest and largest flat note dispenser in the Tidel Sentinel product line. Sentinel has been designed to further reduce the risk of internal theft, streamline in-store management time, and create greater efficiencies in store operations, thereby improving overall customer service.

For more than a quarter century, Tidel has been the recognized leader in the manufacture of retail cash security systems. With over 250,000 systems shipped, major retailers throughout the world have turned to Tidel to provide solutions to their cash handling needs.

The Sentinel family of Cash Management Systems is designed with flexibility and efficiency in mind. The Sentinel can operate either on a stand alone basis or installed as a node on your existing network, and its Windows based software provides secure, 2-way communication between the Sentinel and POS or Sentinel and Corporate Offices. The networked Sentinel system allows users to view and download transactional data or reports, download software enhancements and transfer status indicators or data logs. Tidel's software also provides the unique ability to electronically "command and control" the operation of the Sentinel through the POS terminal, providing full accountability and effectively closing the cash management loop.
