Tidel Announces Expansion of Manufacturing Facilities

Carrollton, Texas - November 29, 2010 – Tidel Revolution LLC, a wholly owned subsidiary of Tidel Engineering, L.P., the world leader in Retail Cash Management Systems and Loss Prevention products, announced today that it is expanding its manufacturing facility to accommodate increased production demand of the Revolution®, Tidel’s state-of-the art, back room cash management system.

“Current and anticipated demand by big-box retailers for the Revolution is straining our existing plant” said Mark K. Levenick, President and CEO of Tidel. “We are fortunate that there is space available right next door, and with a few interior modifications, we can have our own 25,000 square foot addition to the plant, dedicated exclusively for Revolution production, in no time at all.”

“The extension of the lease increases Tidel’s manufacturing footprint more than 50%” according to Troy D. Richard, Tidel’s Executive Vice President, Operations. “We expect the Revolution line to be in full production by the end of Q1, 2011. Meanwhile, we will continue to manufacture the product in our existing space until we are ready to move the line next door”.

In making its decision to execute a lease modification and expansion, Tidel anticipates it will be better prepared to serve the needs of its growing list of Revolution customers, both in the United States and internationally.

ABOUT TIDEL

Tidel Engineering, L.P. is a wholly owned subsidiary of Sentinel Technologies, Inc. (a private holding company), and has been manufacturing cash management equipment, designed specifically for the retail market, since 1978. Tidel designs and manufactures its cash management systems, intended for the smallest to the largest retailers, out of its facility in Carrollton, Texas. Tidel has sold more than 250,000 systems in over 45 countries, handling 18 currencies, and operating in 25 different languages or dialects. Tidel provides 24-hour per day, seven-day per week customer service and support, across the globe. Information about the company and its products may be found on the company website at www.tidel.com.
