Tidel Releases Sentinel SCD-3 – Offers a side vault for storage for the store change fund

Carrollton, Texas — Tidel Engineering, L.P. announces the availability of the newest Sentinel Cash Management System, the Tidel Sentinel SCD-3 (Sentinel Control Device with 3 vaults).

The primary new features of the Sentinel SCD-3 are:

- Additional side storage vault for securing the change fund
- Auto-locking doors on side and bottom vaults
- Open Door Alarm – Alarm sounds if a door is left open longer than a preset time
- Open Door Alarm Reset – Alarm can be reset for a second cycle
- Two anti-fish drop chutes and vaults

“Our customers have asked us for an additional storage vault to secure the store manager’s change fund and eliminate the need for a second safe in the manager’s office” said Ed Grondahl, EVP Global Sales at Tidel.

“Working from an open/unlocked safe is another major concern in all retail establishments, and auto-locking doors and open door alarms assist management efforts to stop this dangerous practice”, Ed continued.

Tidel offers another version of the 3-door safe, the Sentinel Side Vault, that is 15” wide. The Sentinel Side Vault is generally used by retailers who would like to secure several till drawers in the vault that are waiting to be counted or are prepared for start of shift.

ABOUT TIDEL

Tidel, a wholly owned subsidiary of Sentinel Technologies, Inc. (a private holding company), has been a manufacturer of cash security equipment designed for specialty retail marketers since 1978. Tidel designs and manufactures products for cash security and robbery prevention, as well as retail cash management. To date, Tidel has sold more than 300,000 systems in the U.S. and over 50 other countries. Tidel provides a 24-hour, seven-day customer service center and offers customer service and support in over 120 countries worldwide. Information about the company and its products may be found on the company’s website at www.tidel.com or email sales@tidel.com.
