

# AUTOMATE YOUR CASH

THE "UNATTENDED CASH ROOM"

The unique **Revolution**<sup>®</sup> automated cash management and recycling system is designed to completely automate the Cash Room processes, no matter your size or shape. From loading a start-of-shift till balance directly into the till drawer, to returning coins, notes and all other financial paper at day's end, the goal is to create an unattended Cash Room. The **Revolution** will also provide reporting to balance every cashier's till drawer, has back-end network connections and includes a full Cash-in-Transit courier pickup process that can be customized to your specific requirements. In summary, the **Revolution** will balance each cashier to the penny, provide end-of-day automation, recycle coins and notes, automatically prepare your bank deposit, and it will do all this in an unattended Cash Room. If you handle cash, **Revolution** will save you money.
