\$0.05	1,900		4,500		4,500		
\$0.10	3,600		7,800		7,800		
\$0.25	2,700		4,400		4,400		
\$1.00	1,000		2,000		2,000		
Overflow	not included		12,000		12,000		
Total Coin Capacity	14,400		39,400		39,400		

Closed Architecture: Revolution is a Closed Loop System that manages notes without human intervention and offers the best level of security while being virtually mistake proof.

Convenience: Revolution is the only automated system that offers the convenience of both direct dispense to the tills AND dispense to cups for ease of daily management of coin demands.

Palm Scanner: Revolution secures the system and users such that a user's ID cannot be stolen, borrowed, or "used with permission"; supports Biometrics, Card and PIN.

Coin Discrimination: Revolution insures the highest level of integrity by keeping the system from accepting known counterfeit items (i.e., slugs for coin, or lower value foreign coin).

Continuous Monitoring: Revolution systems are monitored 24 hours per day, seven days per week, all year long, utilizing industry-leading, state-of-the art, PCI-compliant monitoring systems.

Same Day Credit: Revolution systems are approved by all major armored carriers (CIT) and most Tier 1 and Tier 2 banks for same day (Provisional) credit.

Easy to Use Operation: Embedded self-help videos insure maximum system uptime, and consistent and correct use of the Revolution.

Future Technology and Growth: Revolution systems meet the needs of our customers, are "right-sized", and will always be able to communicate with the home office and each other.

Scalability: All models of Revolution can be ordered with higher speed, higher capacity PCs.

Single Source System Management: Revolution Retail Systems designs, develops, manufactures, and supports the hardware, software, and middleware of all of its systems.

Complete Cash Management Solution: Revolution automates and supports all three functions of cash management: Till Management, POS Balancing, and Deposit Preparation.

*Capacity estimation is based upon "fit" (new) currency. Actual capacity may vary depending upon the quality of the notes being processed.
