

Tidel Back Office Cash Recyclers

The Tidel portfolio of back-office cash recyclers represents the broadest and most adaptable family of cash recycling solutions in the industry. From stores that range from a single till, to the most dynamic, high volume retail operations, Tidel back office recyclers are designed to adapt to the widest range of cash management needs, no matter the size or complexity.

The Continual Need for Cash Management Efficiencies

The continued resilience of cash as a payment method is driving the need for greater efficiencies in how retail organizations handle their cash on a daily basis. The drive for labor efficiency becomes more pronounced as the retail landscape becomes more competitive, wage pressures increase, and the overall labor pool shrinks. To maintain their competitive edge, retailers must remain vigilant in optimizing the methodologies and processes in how they handle their cash.

Retailers that handle cash using traditional methods are increasingly challenged to meet consumer and business requirements for better customer service, more productive employees, reduced overhead, and greater overall transparency of their cash transactions. Simply stated, the retail market of today demands an environment that is more agile, efficient, and customer focused. To accommodate this reality, retailers must leverage technology that enables them to completely transform, and advance, their cash management environment.

Benefits of Cash Recycling

Recycling cash via an automated cash recycler presents numerous benefits to a retailer:

- Frees up store employees to focus on more value-add and customer facing activities
- Minimizes cash room/back office activities and related costs
- Reduces cash float
- Enables faster access to working capital via daily credit
- Helps reduce losses, cash shrinkage and risk
- Increases operational efficiencies
- Enhances security for staff and customers
- Optimizes end to end cash supply chain costs – including cash-in-transit costs, banking fees, and miscellaneous cash supplies (bags, deposit tickets etc.)

In today's retail environment, consumers have more shopping choices than ever before. To remain competitive, brick and mortar retailers must differentiate themselves by focusing on their core business of driving outstanding customer experience and minimizing their non-core back office processes. Tidel back office cash recyclers help retailers achieve these objectives.

Tidel Back Office Cash Recyclers

Offering the most complete and adaptable portfolio of cash recycling systems in the industry, Tidel back office cash recyclers are helping retailers worldwide successfully transform their cash handling processes. Powered by one common software platform that supports a multitude of note and coin recyclers, Tidel back office cash recyclers enable retailers to automate their cash management processes while providing unparalleled levels of transparency and accountability to all cash transactions. Tidel back office cash recyclers help retailers significantly reduce their daily cash float, consolidate banking relationships, and greatly minimize the manual handling of cash – freeing up employees to focus on more productive activities.

Tidel back office cash recyclers are designed for unparalleled performance and adaptability to support a wide range of cash management requirements. Our approach helps retailers rapidly respond to evolving cash handling requirements while simplifying operations and reducing store overhead. Our portfolio enables mix and match flexibility when combining note and coin

One Common Software Platform

At the heart of Tidel back office cash recyclers is the software solution that powers it. The included software solution is expansive, easy to use, and completely adaptable to any user environment. It simplifies the process of managing users, assigning permissions, running reports, and managing cash balances. The software solution offers a status bar that provides a dashboard-like status of all system components, allowing for proactive engagement when needed. It also enables remote access capability, so authorized parties can perform necessary maintenance, or assist with troubleshooting, if required. Tidel back office cash recyclers offer the industry's most comprehensive software package needed to manage the note and coin processing of a cash-intensive retail establishment.

Why Tidel

For over 45 years, Tidel has helped numerous organizations across the globe greatly improve the way they handle their cash. In so doing, we've helped organizations develop stronger business practices, enable more productive employees, and enjoy greater profits. We pride ourselves on continually investing the latest technologies that help organizations secure, streamline, and automate their cash environment.

Our Differentiators:

- We have the broadest portfolio of cash management solutions in the industry - from smart safes to cash recyclers – capable of addressing the full spectrum of retail cash management challenges
- We are the most reliable smart safe provider in the world
- We are trusted by more than one third of the top 100 US retailers for their cash handling needs
- We maintain the largest network of certified service technicians, ready and able to quickly troubleshoot and resolve system issues in the field
- We have developed unique capabilities within our cash management portfolio, including support for peer to peer, remote management, and remote bill upgrades
- We have delivered a flexible and configurable software platform that is designed to optimize an organization's unique cash handling requirements and processes

Optional Drop Vaults

Our portfolio of recycler drop vaults provide a secure and convenient way to perform manual currency drops whenever required. The Tidel recycler drop vaults are offered in two different styles – a standard size drop vault and a larger drop vault that offers an additional storage compartment. This storage compartment enables secure storage of items such as paper rolls, coin bags or other accessories. Each drop vault, as well as the additional storage compartment, requires biometric access, offering additional levels of security and convenience. The recycler drop vaults easily connect to Tidel back office cash recyclers via the provided data cable.
